The book begins with a look at the early days of the epidemic in the UK. In the 1980s, HIV was a new and terrifying virus that was spreading rapidly through the gay community. There was no cure for HIV, and people who were diagnosed with the virus were often given a death sentence.

Despite the fear and prejudice that surrounded HIV, a group of activists began to fight for the rights of people living with the virus. They demanded better treatment and care for people with HIV, and they fought to end the stigma and discrimination that was associated with the virus.

Thanks to the work of these activists, the lives of people living with HIV have improved dramatically over the past few decades. There is now a range of effective treatments available for HIV, and people with the virus can live long and healthy lives.

However, the fight against HIV is not over. There are still many people who are living with HIV who face discrimination and prejudice. And there is still no cure for the virus.

This book is a reminder of the challenges that people living with HIV have faced over the past few decades. It is also a celebration of the resilience and strength of these individuals.

If you are interested in learning more about HIV, or if you know someone who is living with the virus, I highly recommend reading this book.

Reviews

"A powerful and moving account of the challenges and triumphs faced by people living with HIV in the UK." - The Guardian
