It begins in the summer of 2018, when the family's young daughter, Lily, is bitten by an insect while playing in the backyard. At first, the bite seems like nothing more than a minor annoyance. But within a few days, Lily begins to develop a fever, headaches, and muscle pain.

The family takes Lily to the doctor, but the doctor dismisses her symptoms as the flu. Over the next few weeks, Lily's condition worsens. She becomes

lethargic and unresponsive. Her skin turns yellow, and her eyes become bloodshot.

The family takes Lily to the hospital, where she is finally diagnosed with Rocky Mountain spotted fever, a deadly disease that is transmitted by ticks. The doctor tells the family that Lily is very sick, and that she needs to be treated with antibiotics immediately.

But the hospital does not have the antibiotics that Lily needs. The family is told that they will have to wait for the antibiotics to be shipped from another hospital. While they wait, Lily's condition continues to deteriorate.

Finally, after three days, the antibiotics arrive. But by then, it is too late. Lily dies from Rocky Mountain spotted fever.

The family is devastated. They cannot believe that their daughter has died from a disease that is easily treatable with antibiotics. They are angry that the hospital did not have the antibiotics on hand, and that they had to wait for days for the antibiotics to be shipped from another hospital.

The family files a lawsuit against the hospital. The hospital settles the lawsuit for an undisclosed amount of money. But no amount of money can bring Lily back.

The family's story is a tragic reminder of the dangers of medical neglect. It is also a story of the fight for justice. The family's lawsuit helped to raise awareness of the dangers of Rocky Mountain spotted fever, and it helped to ensure that other families do not have to suffer the same fate.

This book is a must-read for anyone who cares about the health of their family. It is a powerful and moving story that will stay with you long after you finish reading.
