Written by a renowned astrologer, this book will help you uncover the secrets of the stars and gain a deeper understanding of yourself and the world around you.

### What is the Zodiac?

The zodiac is a belt of 12 constellations that stretch across the night sky. The sun, moon, and planets move through these constellations throughout

the year, and their positions at the time of your birth can influence your personality and life path.

Each of the 12 zodiac signs is associated with a particular element (fire, earth, air, or water) and a particular quality (cardinal, fixed, or mutable). These elements and qualities give each sign its unique characteristics.

## **The 12 Zodiac Signs**

The 12 zodiac signs are:

1. Aries (March 21 - April 19): Fire, Cardinal
2. Taurus (April 20 - May 20): Earth, Fixed
3. Gemini (May 21 - June 20): Air, Mutable
4. Cancer (June 21 - July 22): Water, Cardinal
5. Leo (July 23 - August 22): Fire, Fixed
